- **Flora Tassone PhD**, Professor, Dept. of Biochemistry and Molecular Medicine, UC Davis MIND Inst.
Topic: Molecular Biomarkers in Fragile X Syndrome and Associated Disorders and Autism
- **Suma Shankar MD**, Assoc. Professor, Dir. Precision Genomics, Dept. Pediatrics, UC Davis MIND Inst.
Topic: Precision Genomics in the Diagnosis of Fragile X and Autism Spectrum Disorders
- **Stephanie Sherman PhD**, Professor, Emory Univ. School of Medicine, Dept. Human Genetics
Topic: Fragile X-Associated Disorders: A Woman's View from The Heart of the Family
- **Anne Skomorowsky MD**, Assistant Professor of Psychiatry, Columbia Univ. Med. Ctr.
Topic: Psychiatric Issues in Mothers of Children with Fragile X Syndrome and Autism: Evaluation and Treatment
- **Robert Miller**, International Patient Advocacy Organizational Consultant
Topic: Parent Support, Patient Advocacy and the Key Role of Clinics
- **Shalini N. Kedia**, Founder Member and Chairperson, Fragile X Society, India
Topic: Creating Awareness about Fragile X Syndrome and Improving Care in India

GOALS

- Expand and develop relationships between Indian and American researchers and clinicians.
- Improve awareness of all Fragile X-associated Disorders throughout India.
- Exchange knowledge between Indian and American professionals about the latest evidence-based treatments for Fragile X-associated Disorders.
- Highlight the relationship of fragile X syndrome to autism.
- Further engage the patient community to expand the reach of the Fragile X Society India.

Teams of American and Indian medical professionals will meet with a limited number of families to provide general recommendations about how to improve the care of their children with fragile X syndrome, autism or related neurodevelopmental disorders.

To learn more about the lecture locations, dates and timings,
or to inquire about the evaluation meetings, please contact the Fragile X Society-India.
